ET710 Assignment 6

Apply CSS layout and animation to create one web page as below.

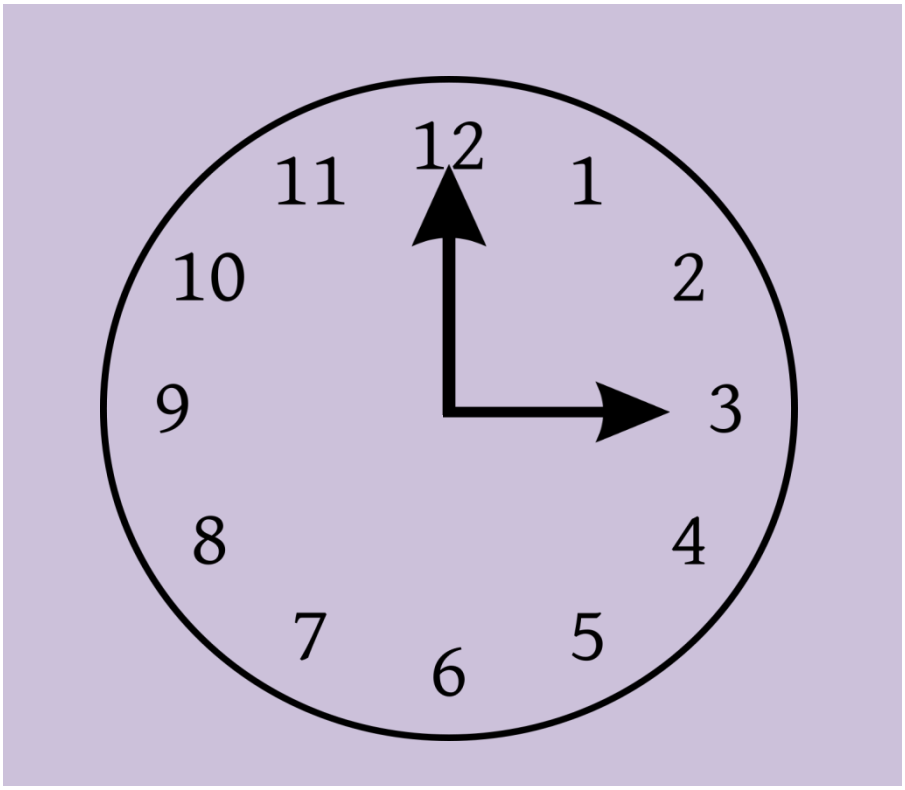

Version 1: Create a clock as below:

Requirements:

- The two clock hands rotate the same way as a regular clock.
- Make the clock hands to move from 3:00pm to 4:00pm. Set animation-duration **10 seconds.** (The hour hand should rotate 30 degrees while the minute hand rotate 360 degrees.)
- Use external CSS only.

Hint:

1. Try to do your own research on how to rotate the clock hand by using a non-center point rotation.
2. The images provided have transparent background; add a bright color background in your assignment.

Version 2 example:
